

# You are invited to a Workshop on Managing Grasslands for Wildlife

When: October 11, 2007

Where: Nemours Plantation (See back for map)

Featured presenter: Dr. Craig Harper, University of Tennessee Professor  
and native warm-season grass expert

9:00 Registration with coffee and donuts  
9:30 Program overview, introduction of speakers  
Board vehicles for field tour

Topics include:

- ➔ Use of prescribed burning, disking, and herbicides to maintain grass and shrubland habitats
- ➔ Importance and management of field borders as wildlife habitats
- ➔ Establishment and maintenance of native warm-season grasses
- ➔ Wildlife use of grassland and shrub/scrub habitats
- ➔ Cost share programs available for establishing and maintaining native grasses and field borders

12:30 - Catered lunch provided; final question and answer session

1:30 - Adjourned

This workshop is intended for land owners, land managers, and conservation professionals interested in enhancing upland grasslands and other open habitats for wildlife. Wear comfortable field clothing as most of the meeting will be held outside. The number of participants will be limited due to space restrictions. To register, call or email to the information below and provide your name, number attending, and contact info. A registration fee of \$10 will be collected at the door. In the event of inclement weather, the workshop may be cancelled.
