

Hazardous Fuels: A Workshop for Burn Managers

Hurricane Katrina created a tremendous volume of down woody debris across south MS. This debris and the increased growth of the forest understory, much of which consists of volatile fuels, have created a hazardous fuel problem for burn managers.

This workshop is designed for Certified Burn Managers and will address the problems and solutions to hazardous fuels in south Mississippi. Topics will include:

- Burn plan preparation
- Smoke management
- Forest fuels and burn operations
- Liability concerns
- Mechanical and chemical fuel reduction
- Site visit to examine the above topics

WHEN

Thursday, Nov. 6, 2014

Registration--8:00 a.m.

Program Starts—8:30 a.m.

Adjourn at 3:00 p.m.

CFE credits are available for foresters.
